

Lucas Bersier

I am a web developer and front-end designer that aims to create websites, webapps, and games that are not only engaging, but also aesthetically pleasing and simple to understand.

I have about 7 years of experience in web design, with knowledge in html5, css3, javascript and jQuery, as well as being proficient in the Adobe® Creative Suite®.

Works

(Full list of works available at lucasbersier.com)

bPresent (2016)

A Web-based slideshow framework and editor. Written in jQuery, this aims to increase compatibility in presentation filetypes while also reducing filesize and the need for proprietary software.

Mslide (2014-2016)

An comic-book viewer and UI built entirely on javascript, (using jQuery), that loads images and chapter information from the folder structure of a server. This was built to remove the need for databases and metadata.

DSUACM Logo (2015)

The winning design in the logo competition for the DeSales Association for Computing Machinery. This logo and design is used on official association newsletters and iconography.

JSRadial (2014)

A JQuery plugin that to draw a radial progress bars. It accomplishes this by using SVG elements, which cuts back on filesize and enables the progressbar to be animated and styled via css.
